EXPERIENCES

Jairosoft Inc. – Bubble Developer Intern (Jairosoft eLMS – Learning Management System) **January 2026 - March 2026**

- Contributed to the development of a custom LMS using Bubble.io (no-code platform), implementing course management, user authentication, and interactive learning modules.
- Developed responsive front-end interfaces for desktop, improving usability and user experience.
- Streamlined course delivery and platform navigation, enabling instructors to manage learning content more efficiently and improving the overall learning experience for students.

Jairosoft Inc. – QA Tester Intern (Colina Health – Overseas Healthcare Application) **January 2026 - March 2026**

- Performed functional, exploratory, and end-to-end testing across critical healthcare workflows, identifying defects early and improving overall application stability.
- Developed and executed structured test cases and scenarios, ensuring features met business requirements and acceptance criteria while increasing test coverage.
- Reported and tracked reproducible defects in Azure Boards with detailed documentation (steps, logs, screenshots, recordings), enabling faster debugging and resolution by developers.
- Partnered with developers and cross-functional teams to validate bug fixes, preventing recurring issues and ensuring stable releases.

Café Beata – Full-Stack Developer (Sales & Inventory Management System)

January 2025 - April 2025

- Developed a web-based sales and inventory system using Vue.js, Python (FastAPI), and MySQL to automate product, stock, and order management.
- Implemented real-time inventory tracking and sales dashboards for daily reporting and analytics.
- Replaced manual tracking with a centralized system, reducing stock monitoring time by ~50% and improving efficiency for managing 100+ products and daily transactions.

EDUCATION

Bachelor of Science in Information Technology

- University of the Immaculate Conception 2022 - 2026

SKILLS

Programming & Web Technologies: JavaScript, HTML, CSS, Vue.js, Python (FastAPI), React.js, Bubble.io, Webflow

Development & Tools: Git, GitHub, Azure DevOps, ChatGPT, Claude

Testing & QA (supporting dev work): Functional Testing, Exploratory Testing, Test Case Documentation, Bug Reporting, Azure Boards

Core Competencies: Attention to Detail, Analytical Thinking, Problem Solving, Communication, Agile Collaboration

PROJECTS

Jairosoft eLMS (Developer Intern): Developer of a custom LMS using Bubble.io with course management and user authentication, delivering a responsive and interactive learning platform.

Togetha (Frontend Dev): Designed and implemented responsive front-end interfaces for AI-Powered Academic Platform with AI-driven features, enhancing learning experiences for health sciences students.

Café Beata (Full-Stack Dev): Developed a full-stack sales and inventory system, automating operations and providing real-time stock and sales tracking.

Colina Health App (QA Tester Intern): Performed functional, exploratory, and end-to-end testing, reported defects via Azure Boards, and collaborated with developers to ensure stable releases and reliable healthcare workflows.

School Canteen Inventory Management System (QA Analyst): Performed functional and automated testing with Cypress, ensuring accurate inventory tracking and reliable system performance.
